

PROPOSAL 1

Website Project Proposal

Paws & Purpose — Animal Rescue & Senior Pet Therapy

1. Organisation Overview

Paws & Purpose is a non-profit started in 2019 in Cape Town. It rescues abandoned animals and finds them new homes. It also runs a pet therapy programme, where rescued animals visit lonely elderly people in care homes.

Mission: To rescue and rehome animals, and to help lonely seniors feel less alone through visits from animals.

Target audience: People who want to adopt a pet, donors, volunteers, care home staff, and the local community.

2. Website Goals and Objectives

- Get more people to ask about adopting pets
- Get more volunteers and donors
- Promote the pet therapy programme and get more bookings
- Goals to measure success: 20% more adoption enquiries within 6 months; 50+ new sign-ups per month; 15+ therapy bookings per month

3. Current Website Analysis

The organisation has no website right now. It only uses Facebook. Problems: no proper list of pets for adoption, not easy to use on phones, no forms, and hard to find on Google. It needs a proper pet list, a mobile-friendly design, and a booking form.

4. Proposed Features and Functionality

- Home page, Adoptable Pets page (with search filters), Pet Therapy booking page
- Get Involved page (volunteer/donate), About Us, Contact, Blog/News

5. Design and User Experience

Colours: Teal, Coral, Cream, and Dark Grey — friendly and warm.

Fonts: Poppins for headings, Open Sans for body text.

Layout: Works well on phones, easy navigation menu, clear buttons like "Adopt Me" and "Donate".

6. Technical Requirements

Needs a .org.za domain name, simple web hosting, and a WordPress website (built with HTML, CSS, and JavaScript)

7. Timeline and Milestones

- Weeks 1–2: Research and planning
- Weeks 3–4: Design and layout
- Weeks 5–7: Build the website
- Weeks 8–9: Add content and test everything
- Week 10: Launch the website

8. Budget

- Domain name: R150–R300 per year
- Hosting: R900–R1,500 per year
- Maintenance: R1,500–R2,500 per year

Loop It Forward — Community Clothing, Toy & Book Swap Network

1. Organisation Overview

Loop It Forward is a non-profit that started in 2021 in Cape Town. It helps families swap clothes, toys, and books their children have outgrown. This saves families money and stops good items from being thrown away.

Mission: To make raising children more affordable and reduce waste by helping families share and swap items.

Target audience: Parents, people who donate items, volunteers, and local schools or community centres.

2. Website Goals and Objectives

- Get more people to know about and attend swap these events
- Let parents sign up their child's size to find matching items
- Get more people to donate items

- Goals to measure success: 25% more people at swap events within 6 months; 100+ families signed up within 3 months; 30+ donations per month

3. Current Website Analysis

There is no website right now. Everything is organised through WhatsApp and Facebook. Problems: hard to see what items are available, people miss event updates, and no way to show how much the group has helped the community. It needs an events calendar, a size-matching tool, and a page showing its impact.

4. Proposed Features and Functionality

- Home page, Swap Events calendar, Size Tracker page (to register your child's size)
- Donate page, Our Impact page, About Us, Contact/FAQ page

5. Design and User Experience

Colours: Sage Green, Gold, Off-White, and Dark Brown — natural and earthy.

Fonts: Quicksand for headings, Lato for body text.

Layout: Works well on phones, simple sign-up forms, clear buttons like "Find a Swap" and "Donate".

6. Technical Requirements

Needs a .org.za domain name, hosting that supports a database, and a website built with HTML, CSS, JavaScript. Needs a free SSL certificate and basic Google search setup.

7. Timeline and Milestones

- Weeks 1–2: Research and planning
- Weeks 3–4: Design and layout
- Weeks 5–7: Build the website
- Weeks 8–9: Add content and test everything
- Week 10: Launch the website

8. Budget

- Domain name: R150–R300 per year
- Hosting (with database): R1,800–R2,500 per year
- Maintenance: R1,500–R2,500 per year
